

ENVIRONMENTAL EDUCATION AT LILONGWE WILDLIFE CENTRE!

Inspiring and immersive learning for youth of all ages

A unique space to learn

Learn about environmental issues from the heart of a protected nature reserve featuring beautiful indigenous forest, diverse wildlife and the Lingadzi River.

Key environmental issues

Learners will take part in fun and engaging sessions on nine core topics, equipping them to tackle key environmental challenges.

Action-based learning

Activities focus on discovery and exploration - learning by *doing*! They include guided forest walks, drama, story-telling, games and hands-on conservation work.

About us

The environmental education programme at Lilongwe Wildlife Centre is run by Lilongwe Wildlife Trust, one of Malawi's leading conservation organisations. Our mission is to save wildlife, campaign for conservation justice and inspire people to value and protect nature in Malawi.

www.lilongwewildlife.org

Environmental education topics

Our education programme covers nine topics (see left) which are linked to Malawi's key conservation challenges and the Sustainable Development Goals.

You can select which topic/s you want your students to focus on during your visit. Learners will then take part in a lesson on those topics.

During lessons the learners will explore the topic, investigate how it impacts their own communities and learn how to take action to make a difference in their school or community. Lessons and activities are tailored to different age groups, from primary school to university level.

Booking information (pre-booking required)
